LESSON 3 · CHEAT SHEET

# Scan Converter

Turning scanner files into NIfTI

## SET UP

**bash** — Unpack the DICOMs

```
bash scripts/setup_data.sh
```

**ls | wc -l** — Count files in a folder

```
ls raw_dicoms/sub-001/FLAIR_DICOM | wc -l
```

**dcm2niix -h** — Check it is installed

```
dcm2niix -h
```

## CHECK

**ls** — See the outputs

```
ls script_niftis
```

**bash** — Run the checker

```
bash scripts/check_conversion.sh
```

**cat** — Read the scan details

```
cat script_niftis/sub-001_MPRAGE.json
```

## CONVERT

**-z y** — Compress output (.nii.gz)

**-b y** — Write the .json sidecar

**-f** — Name the output file

```
-f "sub-001_FLAIR"
```

**-o** — Choose the output folder

```
-o script_niftis
```

**dcm2niix** — All together

```
dcm2niix -z y -b y -f "sub-001_FLAIR" -o script_niftis
raw_dicoms/sub-001/FLAIR_DICOM
```

**IF YOU'RE STUCK**

The command is dcm2niix, with two i's. If -h fails, install it, then close and reopen Terminal.

**FROM YOUR PEER INSTRUCTOR**

"So I would say to just be patient and let it load."

— Lindsey Ko
