LESSON 2 · CHEAT SHEET

Wine Shed

From moving by hand to a script

LOOK

`cat`	Read orders or a wine `cat orders_round1.csv`
`ls`	List the shed `ls wine_shed_round1`

MOVE BY HAND

`mv`	One bottle at a time `mv wine_shed_round1/wine_01.txt baskets_round1/cust_01/`

IF YOU'RE STUCK

Script moved zero wines? cat a wine file and compare its exact text to your grep pattern.

FROM YOUR PEER INSTRUCTOR

"...if we know where it is, then all we have to do is work backwards..."

— Chloe King

AUTOMATE

`for … do`	Repeat for every file `for wine_file in "$SHED"/*.txt; do … done`
`if … then`	Make a decision `if grep -q "^color: $COLOR$" "$wine_file"; then … fi`
`grep -q`	Test if text is in a file `grep -q "flavors: .*cherry" wine_01.txt`
`VAR="…"`	Name a value once `SHED="wine_shed_round2"`
`tail -n +2`	Skip a CSV header `tail -n +2 orders_round3.csv`

CHECK

`bash`	Run the checker `bash scripts/check_baskets.sh round2`
