LESSON 1 · CHEAT SHEET

Virtual House

Moving around a folder tree

FIND YOUR WAY

`pwd`	Show where you are	`pwd`
`ls`	List what is here	`ls Decoration`
`cd`	Go into a folder	`cd House/Kitchen`
`cd ..`	Go up one level	`cd ..`
`cd -`	Go back to the last place	`cd -`
`cat`	Read a text file	`cat House/map.txt`

YOUR FIRST SCRIPT

`nano`	Edit a file in Terminal	`nano make_smoothie.sh`
`bash`	Run a script	`bash make_smoothie.sh`
`chmod +x`	Make it runnable	`chmod +x make_smoothie.sh`

CHANGE THINGS

`mv`	Move or rename	`mv Decoration/bed.txt House/Bedroom/`
`cp`	Copy	`cp Decoration/chair.txt Decoration/chair_backup.txt`
`rm`	Delete for good	`rm Decoration/chair_backup.txt`
`mkdir`	Make a folder	`mkdir House/Garden`
`touch`	Make an empty file	`touch Decoration/table.txt`
`echo >`	Write a line into a file	`echo "A bench." > Decoration/garden_bench.txt`

IF YOU'RE STUCK

Run pwd, then ls. Paths are exact: LivingRoom is not livingroom.

FROM YOUR PEER INSTRUCTOR

"Even something as simple as having two spaces instead of one can completely make the code stop working."

— Chloe King
