LESSON 1 · INSIDE THE README

Unix Basics in 4 Steps

Each step in the Virtual House README pairs a new command with a household task

DELIVERABLE

A house tour for your PI in `house_tour.txt`: what's in each room, and how to get there with `cd`

Explore the rooms

`cd` `pwd` `ls`

Know where you are in a study folder

README · step 4

```
4) Explore (practice cd, ls, pwd):
   cd House/LivingRoom
   pwd
   ls
   cd ../Kitchen
   pwd
   ls
```

Craft your own furniture

`touch` `echo >`

Create files and write notes

README · step 5

```
5) Craft your own furniture (practice touch/echo):
   touch Decoration/table.txt
   echo "Wooden dining table with round edges and a polished surface." > Decorat
ion/table.txt
   mv Decoration/table.txt House/Kitchen/
```

Tidy up

`mv` `cp` `rm`

Rename, back up and delete — carefully

README · step 6

```
6) Organize & rename (mv) / copy (cp) / remove (rm):
   mv Decoration/rug.txt Decoration/carpet.txt
   cp Decoration/chair.txt Decoration/chair_backup.txt
   rm Decoration/chair_backup.txt      # careful: rm deletes
   #Keeping things tidy matters, whether it's data or decorations.
```

Add a garden

`mkdir`

Make new folders as a project grows

README · step 7

```
7) Add a new room — GARDEN (practice mkdir):
   #Build your dream house.
   mkdir House/Garden
   echo "Wooden bench under a maple tree." > Decoration/garden_bench.txt
```
