CURRICULUM MAP

Each Lesson Builds on the Last

Where each skill is first taught and where students use it again

	LESSON 1 Virtual House	LESSON 2 Wine Shed	LESSON 3 Scan Converter	LESSON 4 Virtual Laundromat	LESSON 5 Brain Image Analysis
FIND YOUR WAY					
`pwd` Check where you are	●	○	○	○	○
`ls` List what is in a folder	●	○	○	○	○
`cd` `paths` Move between folders, full and relative paths	●	○	○	○	○
`cat` Read a text file	●	○	○	○	○
HANDLE FILES					
`mv` Move or rename a file	●	○		○	
`cp` `rm` Copy and delete (carefully)	●	○		○	
`mkdir` Make a new folder	●				
`touch` `echo >` Create a file and write into it	●				
WRITE AND RUN SCRIPTS					
`nano` Edit text and scripts in Terminal	●	○	○		○
`bash file.sh` Run a script	●	○	○	○	○
`chmod +x` Make a script runnable	●	○			
`VARIABLES` Name a value once, reuse it	●	○	○		○
AUTOMATE REPEATED WORK					
`*` Wildcard: match many files at once	●	○		○	
`for … do` Loop over every file or subject		●		○	○
`if` `grep` Decide which files match a rule		●			
`wc -l` Count files to check a folder			●		
`CHECK SCRIPTS` Verify outputs before moving on		●	○	○	○
WORK REMOTELY					
`ssh` `scp` Log in to and copy to another computer (simulated)				●	
`sbatch` `logs` Submit a batch job and read its log (simulated)				●	
WORK WITH MRI DATA					
`INSTALL + CHECK` Install a tool and confirm Terminal can find it			●		○
`dcm2niix` Convert DICOM folders to NIfTI			●		○
`.json` Read the sidecar of scan details			●		○
`VIEWER` Review FLAIR and MPRAGE together			●		○
`MASKS` Paint lesion-like spots on FLAIR					●
`COMPARE` Measure masks, compare groups					●
