FIVE GAMES · SIXTEEN PEER VIDEOS

Game-Based MRI Learning for Undergraduates

Learn the command line by playing, then use it on real brain scans. Every lesson comes with videos made by an undergraduate instructor.

LESSON 1

Virtual House

Decorate a house made of folders and learn to find your way around it.

`pwd · ls · cd · mv · nano`

Chloe King
3 videos · 10:31

Start lesson 1 →

LESSON 2

Wine Shed

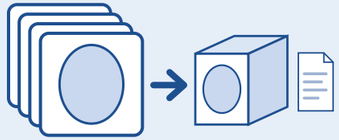

Fill customer orders by hand, then write a script that does it for you.

`mv · for · if · grep`

Chloe King
3 videos · 6:21

Start lesson 2 →

LESSON 3

Scan Converter

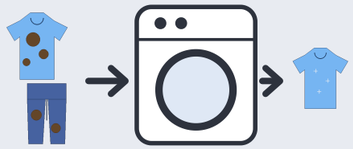

Turn a real participant's raw scanner files into images you can open.

`dcm2niix · NIfTI · .json`

Lindsey Ko
4 videos · 11:01

Start lesson 3 →

LESSON 4

Virtual Laundromat

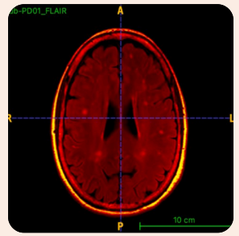

Wash one load by hand, then many at once on a simulated remote server.

`* · loops · ssh · scp · logs`

Osiel Iglesias
3 videos · 10:37

Start lesson 4 →

LESSON 5

Brain Image Analysis

Convert six participants, mark lesion-like spots and compare groups.

`dcm2niix · ITK-SNAP · bash`

Tiffany Huang
3 videos · 8:28
