LESSON 5 · HANDS-ON MRI #2

Brain Image Analysis

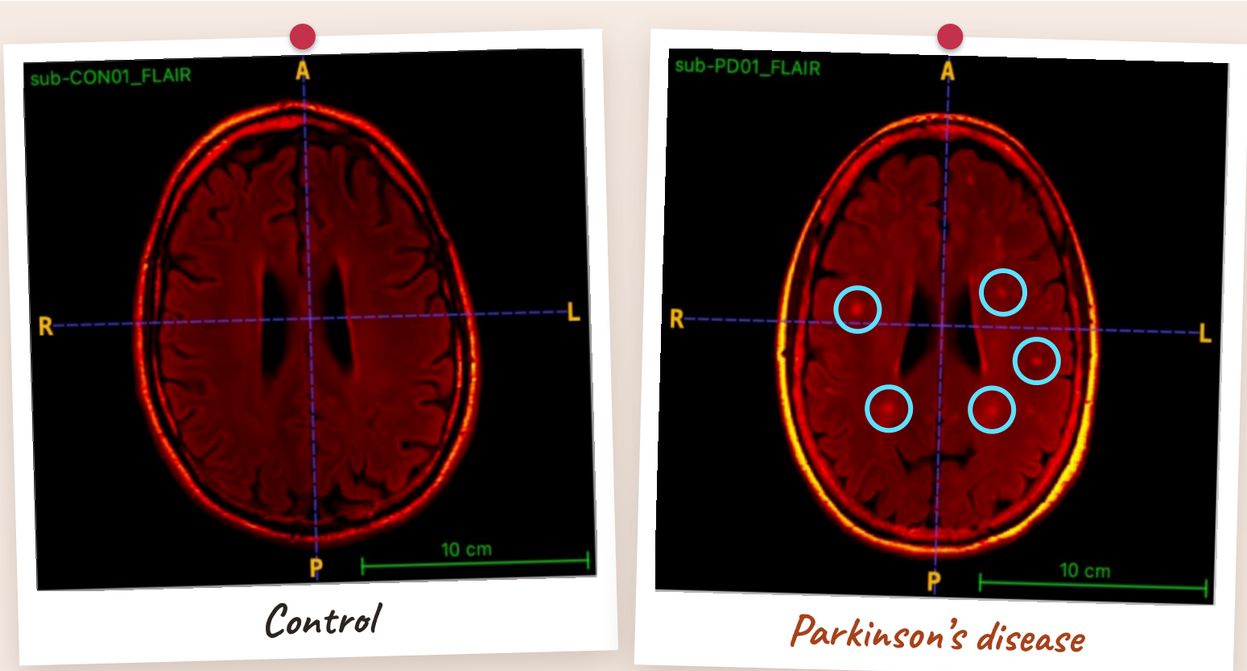

Getting Hands-On with MRI #2: Lesion Identification in Parkinson's Disease Research Through Brain Image Analysis

TOOLS UNLOCKED

ITK-SNAP · FLAIR · .nii.gz · visual QC

Two participants, similar level. What's different?

axial FLAIR

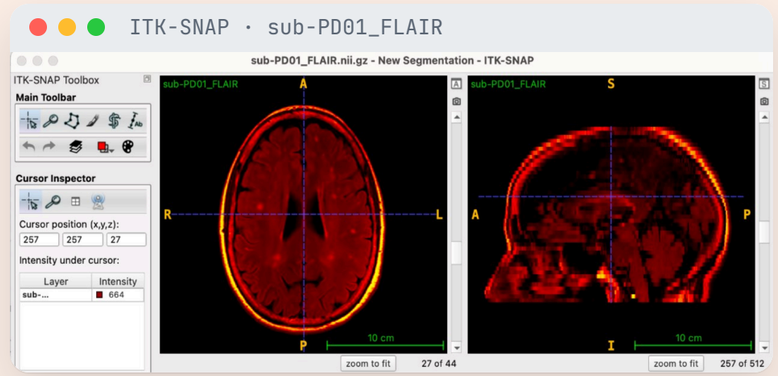

LOOK FOR
Bright spots in the white matter

COMPARE
Similar anatomy, not an exact match

NEXT STEP
Flag it for an expert

1 Open the scan in ITK-SNAP

2 Find a similar level in a control scan

- match anatomy, not slice numbers
- brains differ in size and position

3 Mark candidate lesions for an expert

- Mark it, don't diagnose it
- These spots also come with aging
