A Getting Started: eight short topics with peer-made videos

PREPARE

- G1 Find your way around the project
- G2 Download and set up a lesson
- G7 Check the tools for your lesson

WORK WITH FILES

- G3 Navigate Terminal and find your files
- G4 Relative and absolute paths
- G5 Read, edit, and save a text file

CHECK YOUR WORK

- G6 Run a Bash script and check its output
- G8 Work through an error and ask for help

Undergraduate contributors recorded the videos. A written Getting Started guide accompanies them.

B Help available during a task, shown for Lesson 1, Round 3

REFERENCE SHEET

Its “Your first script” section lists the three commands this round uses: `nano`, `bash` and `chmod +x`.

TROUBLESHOOTING PAGE

“If the smoothie is empty or incomplete, read the ingredient files, examine the input pattern, and open the script before running it again.”

REFLECTION PROMPTS (2 OF 5)

What was one moment where you got stuck, confused, or had to slow down?

What would you do first if you had to solve a similar problem on your own?
