1 Read the error

```
$ head instructions/Round_3_Robot_Washer_Loop.txt
head: …: No such file or directory
```

G8 · 00:38

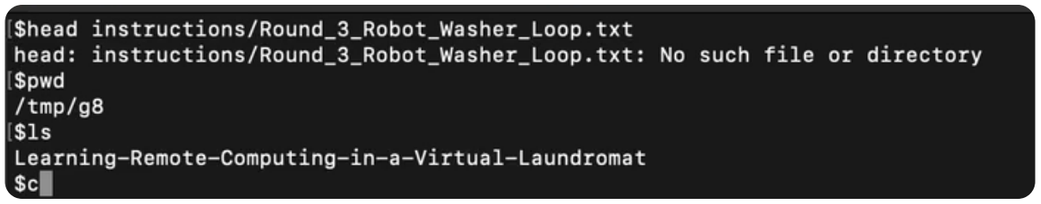

Terminal could not find the file from the current folder.

2 Check where you are

```
$ pwd
/tmp/g8
$ ls
Learning-Remote-Computing-in-a-Virtual-Laundromat
```

G8 · 01:10

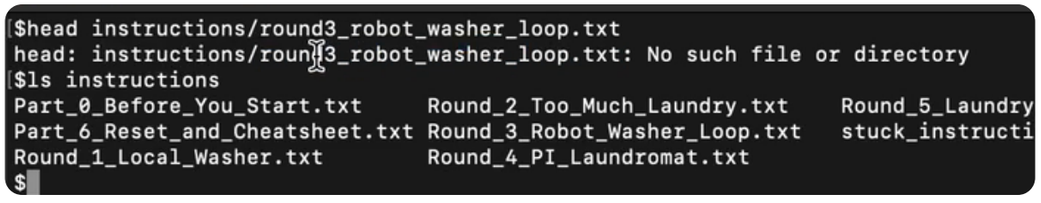

The instructions folder is inside the lesson folder, so move into it first.

3 Check the exact filename

```
$ ls instructions
Round_3_Robot_Washer_Loop.txt …
```

G8 · 02:37

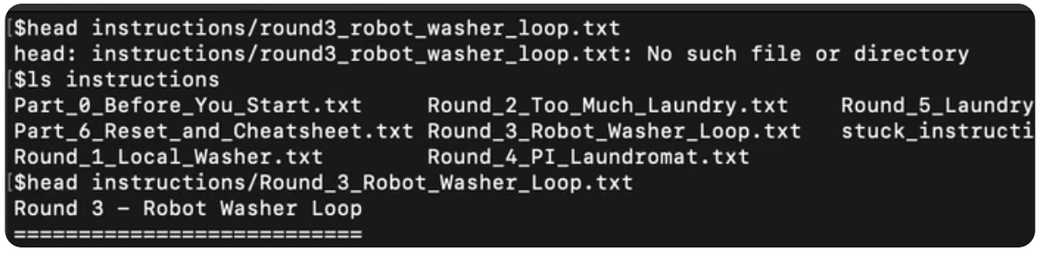

The typed name, round3_robot_washer_loop.txt, differs from the listed name in capitals and an underscore.

4 Rerun with the exact name

```
$ head instructions/Round_3_Robot_Washer_Loop.txt
Round 3 - Robot Washer Loop
```

G8 · 03:36

The file opens. Checking the location and then the exact name led to the fix.

Frames from Aaryan Sajwani's corrected G8 video, cropped to the terminal; commands typeset to the left of each frame. Error wording varies between shells.
