RESOURCES

Which Software Does Each Lesson Need?

The first lessons use Bash and ordinary files; the MRI lessons add tools for conversion, viewing and measurement

LESSON	Bash and a text editor	unzip	dcm2niix	MRIcron	ITK-SNAP	Python 3
LESSON 1 **Virtual House** Ordinary files	NEEDED	—	—	—	—	—
LESSON 2 **Wine Shed** Ordinary files	NEEDED	—	—	—	—	—
LESSON 3 **Scan Converter** Converts and views scans	NEEDED	NEEDED	NEEDED	NEEDED	—	—
LESSON 4 **Virtual Laundromat** Simulated remote steps; no cluster account needed	NEEDED	—	—	—	—	—
LESSON 5 **Brain Image Analysis** Converts, views, marks and measures	NEEDED	NEEDED	NEEDED	—	NEEDED	NEEDED

Image viewers are separate programs. Installing Bash does not provide MRIcron or ITK-SNAP. Open each viewer once to confirm it starts.

Platforms. Checked on macOS. Linux and Windows (WSL) workflows have not yet been validated.
